DETAILED ACTION

1. This application is a 371 of PCT/JP03/05945 which published as WO 03/097760 A1.

Response to Amendment

2. The preliminary amendment filed 09/03/2004 is noted.
3. Claims 1-17 are pending.

Priority

4. Receipt is acknowledged of papers (JP 2002-141729) submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

5. The IDS filed 06/29/2005 has been considered by the examiner.

Specification

6. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
7. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: HYDROPHILICITY PROMOTING AND MAINTAINING AGENT FOR POLYSILAZANE-CONTAINING COATING FILMS AND METHOD OF USING SAME.

8. The use of numerous trademarks has been noted in this application. Trademarks should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

9. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10. **Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

A. The claims recite “An undiluted solution of a hydrophilicity maintaining and promoting agent for a polysilazane-containing coating film that is an aqueous solution with a pH...”. This limitation is indefinite because it is unclear whether the hydrophilicity agent or the polysilazane film is “an aqueous solution with a pH...”. Consequently, one of ordinary skill in the art would not be able to determine the metes and bounds of this subject matter.

B. Further, the claims recite “...and, if necessary, an antiseptic.” This limitation is indefinite because neither the claims nor the specification provide any criteria indicating when an antiseptic is necessary, within the context of the invention, and when it is not.

C. In light of the foregoing, and because every dependent claim necessarily includes the subject matter of the claim(s) from which it depends, the metes and bounds of the subject matter claimed in this application is impossible to determine.

Conclusion

11. The prompt development of clear issues in the prosecution history requires that applicant's reply to this Office action be fully responsive (MPEP § 714.02). When filing an amendment, applicant should specifically point out the support for any amendment made to the disclosure, including new or amended claims (MPEP §§ 714.02 & 2163). A fully responsive reply to this Office action, if it includes new or amended claims, must therefore include an explicit citation (i.e., page number and line number) of that/those portion(s) of the original disclosure which applicant contends support(s) the new or amended limitation(s).
